Brain Jack

Author:
Brian Falkner

Reading Level: Grades 6+

After accidentally crashing the country's online systems for three days, teenage hacker Sam finds himself recruited and working for Homeland Security - and all he intended to do was use Telecomerica's giant bank account to purchase new state-of-the-art laptops and neuroheadsets for him and his best friend. Suddenly, thrust into the world of *professional* hacking, Sam begins to unearth information about Telecomerica and the neuro-headsets that go against even *his* unscrupulous view of privacy.
